

KEISER STRENGTH

A300 BELT SQUAT

Model 1550

LOWER BODY MACHINES

EXPLOSIVE IMPROVEMENT

Build explosive hip and leg strength against as much as 800 pounds of resistance without the resistive load passing through your shoulders and spinal column. It is especially beneficial for taller people, because it eliminates column loading of the spine. Pivoting handles accommodate exercisers from 4'8" to 7' tall. The wide base and optional Deadlift Bar allow for multiple training possibilities. Perfect for any athlete looking to improve their explosiveness – from pitchers, to linemen, to basketball players.

KEISER DYNAMIC VARIABLE RESISTANCE

Keiser's Dynamic Variable Resistance is designed to provide a smooth consistent Variable Resistance force curve at any training speed. Each machine has its own unique Variable Resistance curve designed and tuned perfectly for the muscles being used in that particular exercise. For users, this means that working out any speed, you'll always be training at maximum efficiency.
